PROJECTS

1.Student Management System

- Developed a full-stack web application to manage student information.
- Implemented CRUD operations using Spring Boot, REST APIs, Spring Data JPA, and MySQL.
- Created a responsive React.js frontend for adding, viewing, editing, searching, and deleting students.
- Connected the React frontend with the Spring Boot backend using REST APIs and tested APIs using Postman.

2. Role-Based Leave Management System

- I recently built “I-Tech Solution” , a Full-stack Employee Leave Management System project using Java, Spring Boot, and frontend technologies.
- On the backend, I designed REST APIs with Spring Boot . On the frontend, I decided to write HTML, CSS, and JS.
